

StrategyBot Trading Software Becomes Even More Sophisticated

A new version of this trading software has become available. The previous upgrade was in July 2004. As usual all upgrades are free of charge. For the occasion, Strategyland Research is reducing the cost of entry for Singaporean users only, with an option to buy the software at **SS88*per month** including GST. The **one-time** price remains at **SS1,709.00** w/GST and it remains the least expensive solution over a long period of time.

Getting a charting and execution software like StrategyBot at a cost of SS88 a month surely beats other charting softwares (with no execution) available on the market and which sell for over SS200 monthly.

Be aware that the feeding of live data from all the Exchanges worldwide is free of charge with StrategyBot. This is unique and is very valuable. StrategyLand Research expects to announce soon the **first Singapore Clearing House** partnering for the benefit of StrategyBot users worldwide. Having a local Clearing House will allow a local user to deposit his investment into a local Singapore bank rather than sending it to a USA bank.

Another great benefit of getting an Asian Clearing House is that all users of StrategyBot worldwide may then trade Asian Contracts in addition to European and US Contracts. Users of our Automated Trading Strategies will now fully maximize their investment 24 hours a day with the same amount of investment first used daily with Asian Strategies, then moving to European Strategies and finishing at night with US Strategies. Three times a day the same investment will be used with three different sets of Contracts from three different time zones. This is absolutely unique worldwide. We expect the SGX futures trading traffic to be boosted up. Strategyland Research will start a campaign to convince our non-Asian customers to consider trading Asian futures too. That would create more volatility in Asia and improve the P&L of Asian futures trading. The majority of our customers so far is in USA, Europe and the Middle East.

New Additions to StrategyBot

- More technical indicators. The list is now extended to 11 with:
 - Volume
 - Bollinger Bands
 - RSI
 - Momentum (new)
 - CLV (Accum / Distrib) (new)
 - PVO (new)
 - Single/Double Moving Average
 - MACD
 - Stochastic (new)
 - MomentumDiv (new)
 - OBV (new)
- A huge improvement in graphic setting. The chart setting section is tremendously improved with more on screen information. As an example OHLC (Open, High, Low Close) is now displayed on-screen.
- More Scale-Out options with Auto Trailing Stops.
- A new exit style option "Exit_MOT_TS" which is a customizable end at a defined time, with Auto Trailing Stop parameters programmable.

* Please note that all prices in Singapore dollar vary with the US dollar exchange rate on the day of purchase.

Below is a reminder of a few features of StrategyBot:

1. Can be used for Manual Trading as well as Fully Automated Trading (BotTrading).
2. Free live data from all Exchanges worldwide.
3. Brackets orders with setting an automated profit target and stop loss OCO (one Order Cancels the Other) orders. Supports partial fills!
4. A large library of automated exits:
 - a. **Scale-Out** orders with multiple profit targets and multiple lots.
 - b. **Auto Trailing Stops** - customizable, auto trailing of stop loss.
 - c. Break even: move stop loss to break even.
5. Develop your own personalized automated exits.
6. Parked, Synthetic, Market-on-close (MOC) and Smart orders.
7. Remote server solution: Automated exits and Synthetic orders (e.g. stop orders) are stored on the StrategyBot servers at the Clearing House, so your internet connection or even your own computer being shut down doesn't affect order execution.

Our Website

www.strategyland.com.sg now includes lots of newer information:

- We updated our pricing. We no longer offer single Strategy but offer Strategies as a group.
- Consequently the monthly rental price of a Strategy has been reduced to only **US\$16.33**, down from US\$49. Our groups of Strategies may include from 3 to 15 Strategies.
- We have added a futures trading **game on-line** where all participants may compete with other players worldwide. The

overall winner every month will get a prize. No money deposit is necessary; it is all paper trading. We have dedicated a server for the game.

- We separated the information for users of Manual Trading versus information for users of Automated Trading.
- We added tips to Traders.
- We included charts making it easier for anyone to learn about futures.
- The 30-day Free Demo is now cancelled due to the new SS88 per month price. Instead every buyer of StrategyBot will now get 2 accounts, one "real" to be used for trading with real money invested and one "paper" equivalent to the Free Demo. The "paper" one will be loaded with Automated Strategies.
- More information will be added. Please check our website regularly.
